

Adding a Student

You will need to add a student when you first enroll in Lunch Direct, or simply to add more students.

When you first enroll a family you will be taken to the member or family home page. That has your Member number in the upper right hand of the page.

There is a [link line to add a student](#). Simply select it.

You will be presented with an add student profile page. Complete that selecting the classroom your child is in (that determines the portion size and where the meal will be delivered). Make sure you select the default menu you plan to order from (you can change it while ordering).

When you are finished simply press...

Save Changes

You can continue to add students.
